SUBMITTAL SHEET

MODEL: SIDE WALL ADAPTOR KIT (COMPACT-AIRE PRO SERIES)

KEY FEATURES

- The Sidewall Adaptor Kit provides a versatile solution for installing air conditioning units without an outdoor condensing unit.
- Designed for spaces with limited external wall access, this aluminum adaptor allows installation on an internal wall by redirecting airflow laterally.
- Seamless Integration – Concealed within the wall and positioned behind the heat pump for a clean, modern look.
- Flexible Compatibility – Offered in left- and right-side configurations with various sizes compatible with Compact-Aire PRO models.
- Built-in Mounting Bracket – Designed specifically for Compact-Aire Heat Pumps for easy and secure installation.
- This innovative design expands installation possibilities, making it ideal for spaces with complex architectural layouts or limited wall access.

DIMENSIONS

Compatible Model	**Compact-Aire PRO Series**
Width	39.4"
Height	23.1"
Depth	8.2"
Outdoor Air Supply & Exhaust Diameter	8.0"
