SUBMITTAL SHEET

MODEL: SUNVENT CONNECTOR (COMPACT-AIRE SERIES)

KEY FEATURES

- A custom ventilation connector made to integrate Compact-Aire heat pumps with existing large wall openings, particularly when upgrading from PTAC units.
- Made to Size – Available in custom sizes to suit the project's wall openings.
- Extruded Aluminum Louvre – 0.125" thick sections with 1" deep overlapping blades set at 45°.
- Finish – Clear anodized as standard, with custom colours available.
- Transition Box – 28-gauge galvanized steel, with a divider separating the damper section and duct collars that connect to the heat pump.
- Damper – White, calcium-filled polypropylene for durable, reliable air control.
